FI-UK(G)

Furutech's Award-Winning Pure Transmission Build Quality

Furutech power cords, from the supple, beautifully-made \$99 replacement for CD and DVD players to the award-winning Reference III to the outstanding soon-to-be released carbon fiber series shown at CES '08, display the same integrity of build quality. Furutech Pure Transmission technology turns a macro lens on every element of power and signal transfer applying optimized engineering solutions to well-known problems such as contact resistance, EMI and RFI rejection by using the best materials and processes available.

Meticulous attention to build quality is a large part of the engineering equation: The Evolution power cords feature our treated α (Alpha) μ -OFC conductors with a special polyethylene insulation that withstands high voltages and heat while producing lower capacitance and better mechanical damping. The FI-11(G) IEC connector features nonmagnetic Alpha phosphor bronze conductors with an FI-11M(G), FI-UK(G) /FI-E11(G)/FI-AU(G) connector at the male end with 24k gold-plated blades. These are equipped with Furutech "W" wire-clamp pressure plates for ultra firm contacts and pure, stable power transmission. The male conductors also feature Furutech's Patented Ground/Earth Jumper Technology that bleeds off magnetic interference from the 60Hz field.

MSRP: \$500 • AVAILABLE: NOW

Specifications: Construction and Materials

- Three 7 x 35 bundles of 0.18mm α (Alpha) conductor • total dia. 3.69mm
- Insulation: Polyethylene (Red/Natural/Yellow) 5.5mm diameter
- Inner Sheath: Pb-free PVC (Black) incorporating carbon particles 13.5mm dia.
- Shield: 9 x 24-strand 0.12mm copper wire braid
- Outer Sheath: Ultra-flexible Pb-free PVC (Pearl Blue) 17.5mm dia.
- Jacket: Braided nylon yarn approx. 18.5mm dia.

Cable Construction

“W” Wire Clamp Pressure Plate

Furutech α (Alpha) Conductor Is Composed Of Fine PCOCC Wire Strands Treated With Furutech's α (Alpha) Cryogenic and Demagnetizing Process

The Critics Speak

"The Evolutions, which cost less than half what the Reference IIs do, are by any rational standard extremely high-performance cables, though the References do a better job with low-level details very low-frequency bass, and background noise. ... If, like me, you appreciate taking many sonic steps forward and no steps backward, you'll want to give these components a try."

-- Chris Martens, *The Absolute Sound*

"The sound I heard was simply put spectacular. ... extremely lifelike and palpable without being overly dominate or forward sounding. ... The noise floor was lowered and I was able to hear a rich harmony of musical instruments without excess noise or distortion ... Wholeheartedly recommend these cables to someone looking for more from their present system."

-- Brett Rudolph, *EnjoyTheMusic.com*

"If I had to limit myself to one key term ... I'd opt for relaxed ultra resolution. ... Things sound bigger. ... [Under high SPLs] there's no funny business of compression, smearing or skewing ... The sense of big simply gets bigger and bigger and bigger. ... Tolerances are spot on ... goes in smoothly, locks and unlocks without any undue play ... something luxurious and silken about the Furutech connectors. Like fine Swiss watches ... perform to a very high standard, getting the tactile satisfaction and pride of ownership..."
